2021
BUILDING A SUSTAINABLE COMMUNITY

BISMARCK STATE COLLEGE FOUNDATION
Greetings from the BSC Foundation! As another year has come and gone, I am so grateful that we are able to share this report with you. Even though COVID continues to thwart some of our plans, these pages are filled with many amazing things that were accomplished this year, thanks to our BSC Foundation friends and supporters. I am proud that our employees worked through the difficulties of the year and the challenges that COVID threw at us, of the incredible support from our BSC Foundation board members, and the many donors that stepped up their annual giving to support us through an atypical fundraising year.

With BSC now firmly established as North Dakota’s Polytechnic Institution, there have been many opportunities for growth and supporting our students. This year marked another increase in the scholarships and grants that we were fortunate to award with more than $512,000 awarded to students; and another $1.2 million awarded for BSC special projects. Approximately $2.9 million was successfully raised for endowed scholarships this year, thanks to the North Dakota Challenge Grant, which provided a 50 percent match on all endowed funds.

Additionally, our grants department procured numerous external grants that were critical to expand programming at BSC. For example, a National Science Foundation grant will assist the college in establishing a new Associate’s degree in Automation and Manufacturing; and funding through the North Dakota State Council on Developmental Disabilities began a new Peer Mentoring Program on campus which provides support services for BSC students with disabilities. You can read more about those projects in subsequent pages of this report.

Our mission at the Foundation is to support BSC and its students, and in reflecting over this past year, it is apparent that we are woven into the fabric of this community and helping students achieve their dreams. We are truly building a stronger and sustainable community through affordable, high-quality education, and the growth we’ve seen the past twelve months has only just begun. It has been a good year, and on behalf of our office, thank you for your continued support.

Finally, as you’ll read later in the report, our longtime friend and employee Gordon Binek will be retiring from the Foundation at the end of 2021. I am grateful for his years of support and the many years of dedication that both he and Paula have contributed to our organization. I wish them both the best as they enjoy their next phase of retirement!

Our cover student, Jaxon Volk, is pursuing his Associates in Applied Science with support from the Wachter Family Scholarship. After completing his first year and being part of building a six-bedroom, three-bath, 3,330 square-foot home from the ground up in his BSC courses, Jaxon hopes to start his own business someday.

He will be finishing his general education courses this year, and, following graduation, he’ll be ready to start making his dream a reality. “Having this scholarship was great, helping me to save money on tuition and purchase all the tools I needed to be successful in the carpentry program,” Jaxon said.

The Wachter Family Scholarship was started in 2014 by Chad and Stacy Wachter and Lance and Gail Wachter. The Wachter’s annually donate a residential lot for the BSC Carpentry house project, and the proceeds are used to fund scholarships to students in the BSC Carpentry Program.
The Bismarck State College Foundation abides by all guidelines of the Association of Fundraising Professionals and the Donor’s Bill of Rights. Our cost to raise a dollar is 9.7¢, which is competitive with other organizations and well below the percentage required by oversight agencies. The BSC Foundation is a 501(c)(3) non-profit organization, and all donations are tax deductible as allowed by state and federal tax laws. Most of our funds are permanently endowed, so the assets will be available to assist BSC and students for many generations. Our endowment qualifies for the State of North Dakota 40 percent tax credit.

**2020-2021 Fiscal Report**

**SUPPORT & REVENUE - 2021**

- Contributions $1,310,442 14.4%
- Direct Contributions to Programs $856,336 9.4%
- Investments Gain (Loss) $6,339,825 69.5%

**2021 TOTAL ASSETS**

$52,877,836

**TOTAL FOUNDATION EXPENSE & PROGRAM SUPPORT = $2,945,793**

**SUPPORT & REVENUE OVER EXPENSES**

$6,181,021
Scott Becker has ties to Bismarck State College that were established long before he took on the role of Board of Trustees President in 2020. A Bismarck native, Becker graduated in 1992 from BSC with an Associate’s Degree in Pre-Engineering, before transferring to NDSU to pursue his Bachelor’s in Mechanical Engineering. Eventually, he made his way to Bobcat, where he’s worked for the past 19 years, now serving as Loader New Product Development Engineering Manager.

“After graduating from NDSU, I hadn’t planned on returning to Bismarck, but for so many reasons I’m grateful for the opportunities that provided the path I’ve taken. It’s been great to come full circle – to grow up with BSC and now be able to give back and serve on the board,” Becker said.

“Grow up with BSC” he did. Both Becker’s mom and dad attended BSC, his dad graduating in 1965. Ronald and Donna Becker both worked in education, and dad Ron was an elementary school principal for most of his 42 years with the Bismarck Public School District. After his dad passed away in 2013, Scott and his sister, Holly Becker-Lockett, established a scholarship endowment in their father’s memory. The Ronald R. Becker Memorial Scholarship is a permanently endowed scholarship that provides a $1,000 scholarship per year to a Bismarck student pursuing education.

Grateful students have sent thank you letters over the years, many who had connections to his dad as former students or students with parents who knew the family. While Becker attended BSC with the Adrian Taylor Memorial Scholarship, he, too, had a family connection knowing Adrian’s daughter through his mom.

“Those connections demonstrate BSC as a core of the community,” Becker said. “BSC not only provides an education, but it gives people something to come back to. At BSC there’s such a richness of community where you can not only find your career, but you can experience the arts and humanities, and people want to be a part of that.”

Becker credits his success to his foundational education received at BSC and highlights the small class sizes as key to getting to know professors and classmates, whether a student right out of high school or coming back as an adult. “You’re not just a number at BSC, and the smaller class sizes made it easier for me to stay accountable to myself as a student,” Becker said.

Becker’s long history with BSC has given him a front-row seat to how the changes in industry have shaped the college. The Polytechnic mission, he said, is made possible because of the integration of industry support in the programs over the years, his own employer Bobcat being one of them.

“The closer industry is to the college, the more quickly the curriculum can be tailored to respond to what’s needed,” Becker said. “If the community feels invested in the school as it does with BSC, then the sum is greater than all the parts.”
Benefactor Profile

When Dale Pahlke jokingly calls himself “just a ranch kid,” the people in the room usually all know better.

Pahlke, President and CEO of Dakota Community Bank & Trust, co-founder of Pahlke Steel and Endless Tubing, and cattle rancher, is widely known not just for his success, but also for his extraordinary support of the community. His passion for giving back has been a lifelong trait, modeled by his parents in his youth growing up on a ranch near the Nebraska/South Dakota border. He remembers fondly his mother at age 96, receiving notes of thanks from her former first-grade students from where she used to teach in Mission, S.D.

“There was nothing she wouldn’t do to help out someone in need,” Pahlke said. That same spirit of giving drives his own philosophy in life and work, in particular, he said, the importance of supporting youth and education. “The more we can help our kids, the better the community will be, the better the state, the country, and the world will be,” Pahlke said.

As a community bank, if you’re going to live in the community, you have to be involved in the community and give back to the community.
- Dale Pahlke

From holding fundraisers, to donating equipment, to sponsoring athletic fields and everything in between, Dakota Community Bank & Trust’s name and employees are everywhere in the community, supporting youth in academics, sports, and activities. Pahlke credits his staff for the impact they have been able to make in the communities they serve in western North Dakota. “Our bank does what it does because we have fantastic people that work here,” he said. “I don’t think there’s a bank out there that does what we do. I am so proud of their attitude and the work that they do.”

Because of his love for farming and ranching, supporting students in agriculture and technical programs are important to Pahlke. In fact, Pahlke Ranch recently hired a graduate of BSC’s Farm and Ranch Management program as Ranch Manager. Pahlke and his partner Cindy Schaaf established scholarships at the BSC Foundation to assist students pursuing technical degrees, in addition to the scholarships provided through Dakota Community Bank & Trust. As more and more people do less with their hands, he said, we are reliant upon those in the trades for the services they provide.

“A two-year technical degree is a great foundation to start your own business and to work for yourself,” Pahlke said. “Small businesses, along with agriculture, are the backbone of our country.”

Growing up on his family farm near Woodworth, N.D., Kyle Leapaldt’s love of farming and ranching started early when his grandfather took then-four-year-old Kyle out to the heifer pen to pick one out for his first herd. Fast-forward to 2021, and that’s where you’ll find him when he’s not in school, working with his dad raising cattle and growing grain crops. When he’s in school, he’s hitting the books to receive his degree in Farm & Ranch Management.

“I really like my classes at BSC, and I’m learning strategies and management for when I take over the family farm,” Kyle said. He’s attending school with the help of a Dale Pahlke & Cindy Schaaf Scholarship, receiving one of 10 $1,000 scholarships distributed to students pursuing Agriculture or Welding programs. That’s a perfect blend of skills for Kyle, who is looking forward to taking a welding unit during his upcoming sophomore year at BSC. He’s grateful for the scholarship, as it pays a good portion of his tuition, helping him get back to the family farm with fewer student loans to pay off as he starts his next adventure on the right foot.
### BSC Foundation Annual Giving from

**July 1, 2020 - June 30, 2021**

Conoco-Phillips employees, following a tour of BSC National Energy Center of Excellence facilities, presented a check to BSC NECE and BSC Foundation employees for $25,000 for scholarships to students in energy-related programs.

Employees from Marathon Petroleum presented a check to BSC Foundation and NECE employees in August 2021 for $20,000 for student scholarships. Marathon Petroleum’s donation has been matched 100 percent through the North Dakota Career Builders program, which will provide eight, $5,000 scholarships to BSC students in energy programs.

Dale Pahlke, CEO of Dakota Community Bank & Trust, presented a check for $10,000 to BSC Foundation Development Manager Cory Wrolstad to provide ten, $1,000 scholarships to students pursuing technical fields.
BSC Foundation Lifetime Giving

Lifetime Giving levels are reflective of cumulative gifts from a single donor over their lifetime. Lifetime giving donors are recognized at the annual President’s Club Dinner as they meet new levels of giving.

President’s Golf Event Wraps Up 26th Year

It was a sold-out President’s Club Golf Tourney this year with 34 teams gathering for a round of golf on June 11, 2021, at Prairie West Golf Course in Mandan. The event raised more than $20,000 to support scholarships for BSC Mystic Athletes, bringing the total scholarship funds raised to more than $300,000 over the 26-year history.

Following a beautiful day on the green, golfers and guests attended the Hall of Fame Social where four former Mystic athletes were honored, inducting them into the Class of 2021 Hall of Fame. Wes Spotted Bear (posthumously), Steve Stacy, Albert Hairston Jr, and Masai Ujiri were presented with the honors by now-retired BSC Athletic Director Buster Gilliss. The inductees all played for the BSC Mystic Men’s Basketball Team between 1981 and 2007. Biographies and information on each Hall of Fame inductee can be found at www.bscmystics.com/athletics/hall_of_fame.

More than $7,500 was raised for scholarships this year at the BSC President’s Run, an annual ride that brings together friends of the Foundation and the College for a short daytrip and lunch to a regional highlight. This year’s event took the group to Medora, N.D., to tour the site of the new Theodore Roosevelt Presidential Library on July 16, 2021.

This year’s run was held in memory of longtime BSC friend Mel Fischer, with proceeds establishing scholarships for BSC students.

14th Annual BSC President’s Run Held

The BSC President’s Run welcomes all types of vehicles – two wheels or four wheels are all welcomed!

Northwest Tire Team was one of 34 teams at the tournament. Golfers from left to right included Mitch Stafford, Daniel Pearson, Troy Reno, and Kevin Becker.

Coach Gilliss is reunited with his former player Masai Ujiri at the 2021 President’s Club Golf Event. Ujiri was a standout player during the 1993-94 and 1994-95 season. Following the June 2021 President’s Club Golf event, the Toronto Raptors announced that Ujiri was promoted to Vice Chairman and President. In addition to his work with the league, Ujiri, who hails from Nigeria, also founded Giants of Africa in 2003, a non-profit organization that conducts basketball camps for boys and girls across 17 African countries.

Wife of Mel Fischer, Karen, greets the crowd at the July President’s Run event. Standing next to Karen is her son Chad Fischer.
From his start date in September 1996, former BSC Foundation Executive Director Gordon Binek has seen a lot of changes on campus. During those 25 years, the Foundation built four buildings, purchased one building, and grew their assets from $4 million to $43 million. But for Binek, it wasn’t buildings and assets that made for a rewarding career, it was the people and what the Foundation was able to do to help Bismarck State College and its students. “It’s not what you have, it’s what you do with it,” Binek said. “Over that time, we’ve given millions of dollars in grants and scholarships to the college, and it’s impacted a lot of lives.”

Binek retired from full-time work as the Executive Director at the end of 2015, handing the reins over to Kari Knudson. He continued as Senior Development Advisor since then, working with Knudson and the Foundation staff and meeting with longtime BSC Foundation donors. But this year marks his final year as he retires from the BSC Foundation in December 2021.

Binek’s time at the Foundation has been a family affair, as wife Paula has been at his side since the start, with him often for donor meetings, luncheons, events, and more. The team of two were a great asset, bringing different perspectives and ways of communicating that many donors found personal and engaging. The relationships they’ve created over the years are treasured, Paula said, and they are filled with wonderful memories and friendships from their work together with donors. Binek agrees, as they swap stories of the many donors that have become close friends over the years.

“It’s more than just a job,” Binek said. “You’re doing your job, but the donors are sharing their lives with you.” This is something Binek takes very seriously, and it’s driven his approach to the job.

“It’s all about helping the donor do what he or she wants to do, to meet their goals,” Binek said. This means helping donors direct their funds towards where they want to give – scholarships, academic programming, equipment, etc. – while assisting them with smart financial planning to minimize capital gains taxes and maximize deductions. The work he’s done over his time has made an impact to other charities as well, and he’s proud of his role in helping the statewide 40% tax credit get passed in the early 2000s as well as laws to protect confidential donor records.

“We worked a long time on that, drafting legislation, testifying, but in the end, it helps our donors,” Binek said. “It helps our donors, and it helps us. The Foundation’s sole purpose is to support BSC and its students, and it’s exciting to see it continue to expand.”

As for the students that are helped through the work of the Foundation, they number in the thousands across the country and beyond. And Gordy and Paula have met their fair share of them, looking up alumni during their travels and making new friends.

“It always comes back to the people,” Binek said. “So many alumni we’ve met have thanked us for reminding them how much they loved their time at BSC. That makes for a pretty fulfilling career.”

So many alumni we’ve met have thanked us for reminding them how much they loved their time at BSC. - Gordy Binek

The Binek legacy will continue at the BSC Foundation as Gordy and Paula have established the Gordon and Paula Binek Scholarship Endowment.
Building Up Medical Lab Technology in the Community

What was once a hidden gem among career and technical education programs is no more as BSC’s Medical Lab Technician (MLT) program was thrust into the spotlight this year due to the COVID-19 pandemic. The MLT program was established in 1978 at BSC, and its satellite site in Miles City, Mont., in 2012. While the program has seen steady enrollments, the widespread need for qualified technicians to perform COVID lab tests has brought new light to this exciting career. Prior to the pandemic, the outlook for technicians was booming with an almost 13 percent increase in positions expected through 2029 (Job Service North Dakota). With COVID on the minds of overwhelmed medical facilities, it’s anticipated the need will only grow. And students are starting to take notice.

Enrollment in both pre-MLT and MLT has jumped, with limited enrollment seats filled at capacity. Students have the option of pursuing a 2-year curriculum or an extended 2.5 to 3-year curriculum that culminate in an Associate’s Degree leading to employment or transfer into a 4-year medical laboratory science program.

“Hospitals have been bringing in H1-B Visa workers because we don’t have enough people locally or regionally to fill these positions,” said Mari Volk, Dean of Current and Emerging Technologies at BSC. “Our graduates are landing great jobs as soon as they graduate, and it’s such a great career path for them.” Volk should know, it was her own path out of high school. “I was a young mom, working part time, and studying for my MLT degree at BSC,” said Volk. “My instructors paved the way for me to be successful, and after 15 years in the medical field, I got to come back to the school and help others achieve their goals, just like I did mine.”

Not only has the MLT program directors and faculty seen broader career awareness, the program itself has gotten several new upgrades in equipment, mobile simulation, and space.

In 2019, BSC moved all of its health science programs back to campus with the addition of the new Donna S. Thigpen Health Sciences Facility, doubling its training space for Nursing, Surgical Technology, Emergency Medical Technician, Paramedic Technology, Certified Nursing Assistant, Medical Lab Technician, and new-this-year, Diagnostic Medical Sonography. Using grant funds provided by the U.S. Department of Commerce Economic Administration, the MLT labs received new lab stations, microscopes, water systems, autoclave, chemistry analyzer, and more, fully outfitting the Francisco and Bertha Tello MLT Laboratory.

“Being located with the other healthcare majors gives us more opportunities to collaborate on simulations and a real, hospital-like experience,” said Tracie Seibel, Assistant Professor and MLT Coordinator. “Our new lab is state-of-the-art, but some of the ‘simple’ things have been the most delightful – like new vinyl flooring that...
doesn't break a glass tube on contact, and student seating that is easy to wipe down and disinfect between classes.”

The new student seating, Seibel notes, makes it easier to teach to both on-campus and distance-learners participating through interactive video network (IVN) at the same time. “We serve a lot of rural students from North Dakota and Eastern Montana that, because of work and family commitments, they can’t relocate for school,” said Seibel. “There is an ever-growing shortage for lab techs, especially in rural communities, and we’re providing a critical workforce by offering our program online.”

Not only is the program broadcasted via IVN to rural students, the MLT program will soon be going to them. Grant funds received through North Dakota Governor’s Emergency Education Relief Fund created the MLT Mobile Simulator, a retro-fitted ambulance with all things “medical tech” to take the lab to distance-learners starting the Fall 2021 semester.

“Our train of thought is that we’re here for our students, and we’ll do what it takes to ensure their success in the MLT program and be beneficial in the workforce,” said Seibel. “Our sim ambulance makes that feasible.”

All of the MLT updates were a gamechanger in BSC’s ability to respond to COVID. Because of the new equipment additions, the college was eligible to receive an emergency Clinical Laboratory Improvement Amendment waiver which permitted BSC MLT faculty and staff to perform COVID-19 lab tests safely and legally on campus. That meant that throughout the pandemic, all BSC students had access to regular COVID testing. In addition, volunteers conducted COVID testing two times per week for BSC athletes, allowing them to continue competing safely, as well as testing BSC chorus members in advance of concerts to ensure the health of all participants.

Genny Uchem moved from Nigeria to Seattle, Wash., in 2010 with her husband and her 10-month-old son, and later moved to Bismarck in 2013. After working for many years as a CNA at a nursing home, she wanted to go back to school and get a degree in a health care program. After first looking into nursing, she decided to pursue an Associate of Applied Science in Medical Lab Technician.

Genny applied for and received a sponsorship through Sanford Health, as well as a Francisco and Bertha Tello Scholarship through the BSC Foundation, which she said were critical for her success.

“The MLT program is very challenging, especially while still working full time and raising three kids,” Genny said. “But Mari [BSC Dean over Health Sciences] and Tracie [MLT faculty] were always there to help me and encourage me. They understand that you’re balancing school with work and family.”

With the COVID pandemic bringing more attention to the industry, Genny is proud to be among the graduating class of 2021. “I love the MLT program, but now with COVID, people have an understanding of how important the field really is,” Genny said. “I feel great about my choice, and I love what I do.”

The Francisco and Bertha Tello Scholarship was founded by Dr. Ron and Joyce Tello in honor of Ron’s mom, who was a medical lab technician.
2020-2021 BSC Foundation Grants to BSC

The BSC Foundation grant program provides funding to BSC staff, faculty, and student organizations for a variety of projects. These funds support professional development for faculty and staff, innovative teaching and creative learning projects, performing arts events, campus presenters, training equipment, and more. In 2020-2021, the BSC Foundation granted almost $40,000 to support these efforts.

BSC Alumni Association Celebrates its 60th Anniversary

The BSC National Alumni Association was created in 1961 as the Bismarck Junior College Alumni Association to provide services for alumni and to foster and encourage the development of Bismarck Junior College. With the college’s name change, the alumni association changed their name to the Bismarck State College National Alumni Association and acquired 501(c)(3) nonprofit status in 1983. In 2018, the BSC National Alumni Association joined forces with the BSC Foundation to maximize their impact and support to students in pursuit of a higher education, as well as keeping alumni connected to BSC.

The BSC Alumni Network is now more than 24,000 strong, with alumni in all 50 states & overseas.

We invite you to join us. Visit www.bismarckstate.edu/alumni to find out more information on, becoming a board member, changing your address, finding a classmate, and more.

CONTACT THE BSC FOUNDATION to establish your own scholarship to support BSC students. Matching funds are available for a limited time.

CALL US AT 701-224-5700.
2020-2021 BSC National Alumni Association Board:

The BSC National Alumni Association is dedicated to connecting Alumni and students in lifelong loyalty to BSC, as well as promoting and serving the interests of its membership and the College. This year's board members are, from left to right: Mari Volk, President; Katie Robinson, Vice President; Woody Barth, Chair/Past President; Deb Igoe; Deborah Mantz; Eric Carufel; Gavin McCollam; Jerry Chaussee; and Melissa Gordon.

The 1939 Society is a unique alumni program. With a contribution of $1,939, alumni are inducted into the 1939 Society and established as lifetime members of the Alumni Association. The funds are permanently endowed in the 1939 Society Fund. Earnings from this fund support and sustain association programs that connect alumni with BSC while serving the needs of today's students. Members are recognized online, on a plaque, and at the Alumni Awards Dinner. If you’re interested in joining this prestigious group of alumni and friends, contact Cory at 701-224-5700.

The COVID-19 pandemic caused an almost year-long postponement of the annual Alumni Awards Dinner, but we were finally able to safely gather this year in May 2021 to honor our BSC Alumni and recognize our 2020 Alumni Awardees: 2020 Alumna of the Year Kari Warberg Block; 2020 Rising Star Lindsey Ellefson; and the 2020 Legacy Family of LeRoy and Louise Walker. Last year’s annual report showcased their contributions, and the BSC Foundation/Alumni Team was thrilled to be able to gather and honor them in person.

Kari Warberg Block, founder and CEO of EarthKind accepts her award and shares remarks about her time at BSC and how her BSC education helped her. EarthKind is a company that develops and manufactures high-performance, ecofriendly pest control for households and farms that are sold in 35,000 stores across the country.

Lindsey Ellefson was named the 2020 Rising Star for achieving her goal of working for CNN before the age of 30 with five years to spare. Lindsey graduated in 2011 from BSC and is currently a media reporter for TheWrap.

The LeRoy and Louise Walker Family were named the 2020 Legacy Family and received their award at the 2021 Alumni Awards Dinner. From left to right are family members Alan Walker, Larry Weiand, Jennifer Froehlich, Louise Walker, Susan Weiand, Tyson Froehlich, Greg Froehlich and Sharon Hanson.
With more than 25 years of service to BSC under his toolbelt, Earl Torgerson’s passion for the field of carpentry made him a natural choice for this year’s $25,000 Jack Fellowship Award. Earl will be using his award to complete his Masters of Woodworking designation through the Marc Adams School of Woodworking, one of the most recognizable and credible woodworking programs in America, located in Indianapolis, Ind.

Earl started teaching at BSC in 1995, and throughout his years at BSC has grown the Carpentry program to include programs and courses in Sustainable Building Technology, Commercial Construction, and Furniture Design. When talking with Earl, his pride in his students’ success is on full display, as he scrolls through pictures on his phone of smiling BSC students standing in front of their classroom projects – ranging from hallway benches, to dining room tables, to entertainment centers.

“This certification will help me develop new classes that will broaden educational options at BSC,” Torgerson said. “Often trade students are also very artistic, and courses in things such as fine woodworking will be appealing to my Carpentry students, but also as electives for students from other programs that want to learn more about it.”

The BSC Foundation presented the 2021 Faculty and Staff Awards of Excellence to recipients at the May 2021 BSC Celebration Event. These individuals were nominated by peers and students and are recognized for their outstanding accomplishments and contributions to Bismarck State College.

2021 Recipients from left to right: Jennifer Seibel, Energy Management Lecturer; Shawn Iverson, Associate Professor of Anatomy and Physiology/Biology; Sheila Bitz, Administrative Assistant, VP of Academic Affairs; Lynnette Kraft, Payroll Manager; Lynette Borjeson Painter, Professor of Computers and Office Technology.

The Excellence Awards were started in 1985 by former BSC President Kermit Lidstrom.
From July 2020 – June 2021, Bismarck State College and the BSC Foundation were fortunate recipients of 29 grants, totaling more than $2,246,000. Awarded projects represented a wide variety of initiatives at BSC, for example: launching a new training program for commercial driving licensure; scholarship programs for energy and music students; arts programming for the May 2022 Dakota Bison Symposium; equipment and supply purchases for multiple academic programs; and training workshops for statewide K-12 teachers and college faculty; and much more.

One of the major, grant-funded initiatives this year was a project to expand support and offer new services to students with disabilities. Through funding provided by the North Dakota State Council on Developmental Disabilities (NDSCDD) and Minot State University, BSC has developed two complimentary programs that provide an inclusive and increasingly independent environment for students with intellectual and developmental disabilities.

A three-year award from the NDSCDD has established a Peer Mentoring Program in which student mentors are paired with students with disabilities to develop social, studying and life skills. The Peer Mentoring Program is available for any BSC student with disabilities.

At the same time, BSC also established the REACH@BSC Program – Reaching Employment, Academic, and Community Heights, a program for applied learning and career preparation for individuals with intellectual disabilities. This five-year award was made available through Minot State University and the North Dakota Center for Persons with Disabilities. MSU-NDCPD was awarded a grant from the U.S. Department of Education which implemented a college consortium across the state to increase college opportunity for students with intellectual disabilities.
BSC Polytechnic Update

Bismarck State College has fully transitioned to North Dakota’s only polytechnic institution, a distinction that provides many advantages for BSC students – including hands-on practical learning; flexible career pathways; and professional connections leading to enhanced career choices. The development of polytechnic programming has been a major initiative for BSC President, Dr. Douglas J. Jensen, from day one of his presidency on July 1, 2020. Since that time, great strides have been made in the polytechnic mission by adding new certificates, increasing industry involvement, and implementing applied learning techniques.

“Industry 4.0 impacts every area of modern life, and it will only continue to grow at an exponential rate,” said Dr. Jensen. “We need to prepare our students for that reality, giving them all the tools and resources to be successful as part of the modern workforce.” One of those key tools are enhanced career pathways, which is a process of layering short-term credentials that can give students flexible options that fit their schedules and employment goals.

“BSC career pathways meet the needs of the new high school graduate seeking a two-year degree; the mid-career professional adding on a 16-week certificate for upward career mobility; the full-time working parent attending part-time evening or online courses to change careers; and the K-12 student beginning career exploration,” said Dr. Jensen. “We work with our students and partners to tailor each program to their needs.”

A recent grant award from the National Science Foundation will help establish more career pathways in the coming year for manufacturing and automation, one of many North Dakota industries that will continue to grow as more and more companies automate their processes and implement robotics and coding to manufacture and distribute products. This three-year, $300,000 grant will allow faculty and staff to purchase new training equipment, build curriculum, and enhance career awareness and outreach to potential students statewide.

“Working hand-in-hand with industry, we’ve got our finger on the pulse of emerging and advancing technologies,” said Dr. Jensen. “And we will continue to grow our educational options and build the highly-skilled talent that our regional industry needs.”
Clairmont Legacy Builds Up Scholarships For Students

William and Patricia Clairmont had many core values that they’ve passed onto their four children – values like freedom, education, family, and patriotism, to name just a few. Following the death of their parents in 2020, it was important to their children Cynthia, Nancy, Steve, and Julie, to honor those values by establishing a scholarship endowment for BSC students.

“When BSC’s affordable tuition, these scholarships really make a tremendous impact on students,” said Nancy, and her siblings all agree. “Education was so important to Mom and Dad, and supporting BSC was in Mom’s heart,” Cynthia said.

As the siblings sat together laughing and sharing stories about growing up in Bismarck, their admiration for their parents’ legacy was clear. Fun reminiscences about Thanksgiving sledding parties down their backyard hill (avoiding the barbed wire fence at the bottom) and long drives down to the shop with dad are sprinkled with memories of hard work, improving oneself, and having a vision.

“Our dad was very savvy, very business-oriented, and everything he looked at, be it a vehicle, home, driveway, business, he would see it through the lens of how it could be ‘optimal,’” said Julie. “He had a vision for every part of his life,” Steve said, “and his wife and support team were there to make it happen.”

William and Patricia Clairmont were married in 1950 and lived in Walhalla, N.D., before making their home in Bismarck in 1962 where they founded and operated their land development and construction business. Married for 69 years, Bill and Pat were passionate about education and held numerous leadership roles, giving back to the community through civic, social, and educational organizations. Passing their parents’ legacy onto future generations attending BSC is something that the siblings know will make a significant difference in many lives.

The longevity of their donation to the BSC Foundation played a major role in the Clairmont family's decision. “This endowment will provide scholarships for BSC students long into the future,” said Cynthia. And the benefit students receive from these scholarships aligns with the family’s number one core value.

“Freedom was the most important value my dad felt, and all of us share that same value,” said Nancy on behalf of all the siblings. “Education provides the ultimate pathway to freedom, and this is what our parents would have wanted.”

Interested in establishing an endowment in memory or honor of a loved one? Send your mailing address to bsc.foundation@bismarckstate.edu to receive a copy of our Endowment Brochure for more information.
