

Read&Write for Mac

Before downloading this program, you may need to allow apps downloaded from anywhere. Otherwise you might receive a “File is damaged” error and have to download the program again after changing the setting.

First go into **System Preferences** and then click on **Security & Privacy**. Once here you may need to click the lock and enter your Administrator password before you can click the radio button. Then click **Anywhere**. (see screenshot below).

To download the software, follow this link to the BSC Software Downloads on the NDUS SharePoint site. Use your email credentials to sign in.

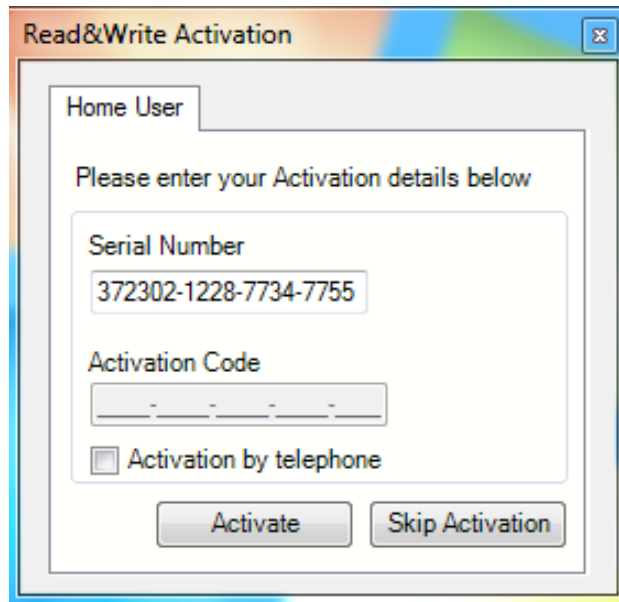

<https://ndusbpos.sharepoint.com/sites/bsc-files/default.aspx>

Download the MacSetup.zip file from the website. Once you have done so, please re-enable the security by going back to **System Preferences**, then **Security&Privacy**, and changing the setting back to **Mac App Store and identified developers**.

Double-click the downloaded file to unzip it. Then copy the Read&Write Gold.app file to your Applications folder.

 Read&Write Gold.app	Aug 14, 2014, 9:13 AM	567.4 MB	Application
 rwg-mac-601-home.zip	Oct 28, 2014, 3:40 PM	185.5 MB	ZIP archive

Once the file has been copied click on the **Read&Write Gold for Mac** file to start the program. You will see a Read&Write Gold Activation screen and will be prompted to enter the activation details.

Nothing needs to be entered, simply click the **Activate** button. Once Read&Write Gold for Mac has been activated it does not need to be activated again for the current user. Read&Write Gold for Mac will now open and you will be ready to use it. Enjoy your new product!
