

AUTOMOTIVE TECHNOLOGY

TECHNICAL • LIMITED ENROLLMENT

Automotive service technicians inspect, maintain and repair automobiles and trucks that run on gasoline, electricity, or alternative fuels such as ethanol. Automotive service technicians' responsibilities have evolved from mechanical repairs to high-level, technology-related work. BSC's program is certified by the National Automotive Technicians Education Foundation, an evaluation board of the Automotive Service Excellence (ASE). All BSC instructors have achieved ASE certification.

PREPARATION AND REQUIREMENTS

Employers look for people with strong communication and analytical skills. Technicians need good reading, mathematics, and computer skills to study technical manuals. They must also read to keep up with new technology and learn new service and repair procedures.

Recommended high school courses include physics, chemistry, algebra, computer keyboarding, introduction to electricity, English, and business management. Prior automotive training is helpful. This program has minimum entrance requirements. Details can be found at bismarckstate.edu/placementscores.

CAREERS

- Auto technicians
- Auto sales and service
- Parts manufacturing/sales
- Sales
- Farming and ranching
- Shop owner

The increasing lifespan of late-model cars and light trucks will further increase demand for qualified workers. Those with training in advanced automotive technology, such as hybrid fuel or computer systems – should have the best job prospects.
