Population growth has spurred the need for surgical technologists, who are in demand throughout the nation in hospitals, ambulatory surgery centers and clinics. As an allied health professional, the surgical technologist works to ensure patient safety in settings that involve invasive procedures. They possess expertise in the theory and use of sterile and aseptic techniques and apply their knowledge of human anatomy, surgical procedures, instruments and technology to facilitate a physician’s performance in the operating environment.

PREPARATION AND REQUIREMENTS
A strong science background is recommended. High school courses should include the biological sciences, especially anatomy and physiology. Successful students are those who are able to perform under pressure in stressful and emergency situations. A strong sense of responsibility, organizational skills, manual dexterity and physical stamina are vital.

CAREERS
• Hospitals
• Clinics
• Same day surgery centers
• Medical insurance companies
• Labor and delivery suites
• Medical sales companies
• Sterile supply services

National Certified Surgical Technologist Exam Pass Rates: For the most recent cohort, the BSC Surgical Technology Program has a 100% pass rate on the exam.
YOUR BEYOND
STARTS HERE

IF YOU’RE A NEW STUDENT
