- Proficiency and productivity
- Takes initiative, contributes to success
- Critical thinking and creative problem solving
- Builds collaborative relationships
- Inclusive and equitable
- Adaptive, teachable and flexible
- Forward-thinking mind-set

Certificate is pending HLC approval

HANDS-ON LEARNING. WORKFORCE READY.

BSC's new Career Readiness Certificate provides you with skills to set you apart.

Dependability, teamwork/collaboration, problem-solving and flexibility are the most sought-after traits employers want to see in their employees. Additionally, employers have the most difficulty finding employees who exhibit critical thinking, creativity and communication (shrm.org). You've heard these skills referred to as "soft-skills," but BSC prefers the term "employable skills" due to the critical nature of what they contribute to a business or industry. Students who earn this certificate will not only learn the theory behind these topics but will also directly apply their knowledge to practical learning experiences specific to their field of interest.
