

CUSTOM APPLICATOR

What is a Custom Applicator?

Custom Application is a service provided by agronomy centers to area farmers. Farming operations may also hire a personal custom applicator. Custom Applicators mix, load and apply pesticides and fertilizers to fields at approved applicable rates. They are responsible for the operation of spray equipment and the effective application of pesticides or fertilizer. Custom Applicators also operate and maintain a variety of equipment and vehicles including sprayers, spreaders, and trucks. They use software systems to assure accuracy and environmental stewardship while maintaining accurate application records and communication with customers.

Custom Applicators are responsible for operating and maintaining all equipment and vehicles, mixing, loading and applying pesticides and fertilizers, handling and delivering bulk and packaged chemicals, maintaining application/spray records, managing customer service relations, organizing and coordinating with customers, being knowledgeable of seed, chemicals and fertilizer to make informed decisions.

A Growing Industry

Become a Custom Applicator and prepare for a high-demand career in the agriculture industry, the number one industry in North Dakota and the Midwest. The need for Custom Applicators is projected to increase by 10% over the next five years. Several agriculture career hiring firms indicate Custom Applicators are in the top five in-demand jobs in agriculture.

An affordable and quick stackable certificate!

The Custom Applicator program prepares participants in custom application of crop protection products. Greater technical expertise is required to ensure proper application of fertilizers and pesticides due to developments in precision equipment, advanced crop technologies, and increased environmental awareness. Introducing the concepts necessary for proper operation of applicator equipment, the training will provide students with the necessary skills for success in this career field.

Training Outcomes

The Custom Applicator training program is a combination of classroom theory and hands-on training in precision agriculture, agronomy, and agriculture math concepts. Content delivery is provided in multiple formats including lecture, class discussion, independent assignments, and hands-on or behind-the-wheel demonstrations.

This program culminates in a one-week, on-campus industry training where participants receive hands-on training on applicator equipment operation and maintenance. Industry members providing expertise and equipment include RDO, Case IH and Butler.

Flexibility of online instruction, combined with intensive industry training, allows students to gain the skills needed for this high-demand career while continuing to work.

Upon successful completion of the program, participants will receive a Bismarck State College Custom Applicator Certification and a North Dakota Commercial Applicator License.*

Participants will be prepared to take the Commercial Drivers License's (CDL) permit exam.

* Reciprocity eligible for bordering states

Custom Applicator Course Details

Precision Agriculture Operations \$480

Self-paced, Online (estimated at four hours per week)

January 9 - March 5, 2023

Provides a background on precision agriculture. Emphasizes working with control consoles, equipment, precision digital platforms, zone management, and variable rate management.

Applied Agronomy \$480

Self-paced, Online (estimated at four hours per week)

January 9 - March 5, 2023

Teaches the basics of crop and pest identification. Covers types of pesticides and fertilizers, their uses, and application methods. Provides an emphasis on pesticides in the environment and how to avoid off-target contamination. Participants will be prepared to take the Commercial Applicator Ground Core exam.

Fertilizer and Pesticide Calculations \$480

Self-paced, Online (estimated at four hours per week)

January 9 - March 5, 2023

Applies mathematical concepts and skills as they relate to fertilizer blending and pesticide mixing and application.

Applicator Equipment Operations \$480

Self-paced, Online (estimated at four hours per week)

January 9 - March 5, 2023

Participants will acquire knowledge of applied theory and concepts of the operation and maintenance of equipment utilized in custom application of crop protection products. Participants will be prepared to take the CDL permit exam.

Applicator Equipment Training and Certification \$500

In-person, 8:00 am - 5:00 pm (40 hours)

BPS Career Academy, Multipurpose Room

February 27 - March 3, 2023

Participants will acquire hands-on training on the operation and maintenance of Butler, Case IH and John Deere equipment utilized in custom application of crop protection products. The North Dakota Commercial Applicator License exam will be administered as part of this course. Participants who take the exam will be advised to register with the NDSU Pesticide Extension. The fee to take the exam is the participant's responsibility and is estimated at \$150.

Reciprocity eligible for bordering states.
