BSC’S FIRST DESTINATION REPORT

The Bismarck State College First Destination Report reflects students’ outcomes and their first destinations once they finish technical and career programs at BSC. This report provides prospective students with information as they begin researching possible educational and career paths.

Due to the cyclical nature of business and industry, this report is not a long-term view, but rather an informational resource for career planning. Local and regional economies may impact different outcomes in this report from year to year.

The data for this report was collected through the National Student Clearinghouse, e-mail surveys, telephone calls, and program instructors.

This report contains information concerning graduates of the respective programs in which they were enrolled. Students are identified for follow-up by the Registrar’s Graduate Report, which ran from July 1, 2018 to June 30, 2019. A graduate is defined as a student who has completed the required coursework for a Bachelor of Applied Science degree, an Associate in Applied Science degree, a Certificate, or Diploma program. These students must apply for graduation to be identified in the Registrar’s Graduate Report.

The First Destination Report is provided by the BSC Mystic Advising and Counseling Center (MACC) as an extension of our work with students, employers and BSC staff. We also provide students and BSC employees with national labor market information, and other information relevant to career planning.

Students also have access to Job Seekers Network an online system used by the MACC to post employment opportunities. Find Job Seekers at bismarckstate.edu/jobseekers.

Questions? Contact us at 701-224-5752 or online at bismarckstate.edu/careers.

Notes: Respondents were categorized as continuing their education if they were enrolled in a college/university and did not have relevant employment. When relatedness of employment or location of employment was not reported by respondent but the company name was provided, research into the company's work and location led to categorizing location and relatedness to students' degree. Wage data is provided by respondents with related employment in-state and out-of-state. Wage ranges may reflect salaries for individuals entering their career as well as for individuals already working in the field prior to completing their degree. When insufficient data was available, no wage range is indicated.
