

CUSTOM APPLICATOR

PROGRAM CERTIFICATE

TECHNICAL • ONLINE • LIMITED ENROLLMENT

CAREER opportunities

Custom Applicators are hired by agriculture industry and state agencies to operate heavy farm equipment.

The global economy offers many opportunities to provide food, animal feed and energy, which makes it an exciting time to be involved in agriculture.

HANDS-ON LEARNING. WORKFORCE READY.

Get a solid foundation to start your career as a Custom Applicator of crop protection products with a short-term certificate.

The certificate of completion will help you gain greater technical expertise and is required to ensure proper application of fertilizer and pesticides due to developments in precision equipment, advanced crop technologies and increased environmental awareness. Introducing the concepts necessary for proper operation of applicator equipment, this training will provide you with the necessary skills for success in this career field.

This certificate provides online instruction in precision agriculture, agronomy and fertility basics and agriculture math concepts. It also includes instruction required for industry certifications. This program culminates in an on-campus industry training component where students receive hands-on training on applicator equipment operation and maintenance.

PRESCRIBED TECHNICAL PROGRAM REQUIREMENTS

AGRI 102	Fertilizer and Pesticide Calculations
ASM 102	Applicator Equipment Operations and Maintenance
PAG 105	Precision Agriculture Operations
PLSC 105	Applied Agronomy

This program is supported by grant #2020-67037 from the USDA National Institute of Food and Agriculture.
