HANDS-ON LEARNING. WORKFORCE READY.

As a financial professional, you will support industrial, financial, nonprofit and government organizations.

These degree pathways are designed to provide the technical knowledge and analytical skills to begin or advance your career in a wide range of industries that rely on financial professionals. Coursework including topics in finance, marketing, leadership are integrated with direct field experience through internships. By doing this, students graduate with in-demand skills and are ready to influence how business is conducted.

Within this flexible pathway, students have many options. You can apply previous experience towards the degree or customize your education to meet in-demand skills.

FINANCIAL TECHNOLOGIES (ASSOCIATE OF APPLIED SCIENCE DEGREE)

Provides the foundational concepts on planning, managing, and analyzing the financial and monetary aspects of an organization's performance. Courses include accounting, economics, marketing, business communications, statistics, and an internship.

FINANCE (BACHELOR OF APPLIED SCIENCE DEGREE)

Prepares students to plan, manage and analyze the financial and monetary performance of an organization through application of finance theory to real-world situations via an internship.

CERTIFICATES (16-18 CREDITS)

Choose one or more certificates in Accounting, Management, Entrepreneurship, and Leadership to diversify and strengthen your skills for career advancement opportunities.
