HANDS-ON LEARNING WORKFORCE READY.

Lock in the know-how that keeps today's digital workplaces out of harm's way.

With Bismarck State College's Business End User Security Certificate, you'll gain practical skills to help identify, understand and respond to common cybersecurity threats in professional and personal settings. Whether you're entering the workforce, strengthening your current role or adding essential security knowledge to another degree, this certificate can help you become a more confident and security-aware employee.

Through this certificate, you'll explore key cybersecurity concepts and terminology, data storage, hardware and software used to access and process information, phishing, malware, data breaches and network security fundamentals. You'll also learn how to support safer technology use across business environments while understanding the role employees play in protecting information and systems.

Build on your success. Credits from this certificate may stack into BSC's Associate in Applied Science in Cybersecurity and Computer Networks, allowing you to continue your education with a Bachelor's of Applied Science in Cybersecurity and Information Technology
