

BIOTECHNOLOGY

ON-CAMPUS • HYBRID • CERTIFICATE

BISMARCK
STATE COLLEGE

North Dakota's
Polytechnic Institution

Biotechnology skills are valued across healthcare, laboratory, research and life science industries, creating opportunities for continued education and careers that support scientific discovery, medical advancements and laboratory operations.

CAREER opportunities

- Clinical Laboratory Technologist
- Clinical Laboratory Technician
- Biological Technician

HANDS-ON LEARNING **WORKFORCE READY.**

Build a foundation for a future in science and healthcare.

With Bismarck State College's Biotechnology Certificate, you'll gain foundational knowledge in biology, chemistry and biotechnology while developing the laboratory skills used throughout the scientific and medical fields. Through hands-on learning, you'll practice laboratory techniques, analyze scientific data, solve biotechnology-related problems and communicate scientific findings. Whether you're exploring a career in science or preparing for further education, this program provides a strong starting point for your academic and professional journey.

BUILD ON YOUR SUCCESS

Build on your success. This certificate can be completed independently or alongside BSC's Associate in Science Biology transfer pathway, giving you a strong foundation for continued study in biology, biotechnology, health sciences and related fields. The coursework prepares you to transfer into a bachelor's degree program and continue building the knowledge and skills needed for advanced careers in science and healthcare.
