- Independent Living Programs
- State and Federal Government Agencies

HANDS-ON LEARNING **WORKFORCE READY.**

Ready to make a difference in the lives of others?

Prepare for a meaningful career focused on helping individuals, families, and communities thrive with a two-year Associate in Arts in Social Work from Bismarck State College.

You'll explore how social workers support people through clinical and community-based services, research, advocacy and policy development. You'll learn how social workers create a framework for people to develop capacities and strengths that enhance their relationships and social functioning. This program provides the core coursework needed to continue toward a bachelor's degree in social work.

PREPARING FOR SUCCESS IN YOUR DEGREE

If you're interested in social work, you should be emotionally mature, objective and sensitive to the needs of others. You'll need to handle responsibility well, work independently, and build strong relationships with clients and coworkers.

As a social worker, you may work with people of different ages, cultures and life experiences in a variety of settings. All states also have licensing, certification or registration requirements for social work practice.
