

PRE-VETERINARY (TRANSFER)

ON-CAMPUS • ONLINE • HYBRID • ASSOCIATE IN SCIENCE

Careers in veterinary medicine continue to be in demand as the need for animal healthcare grows in clinics, agriculture, research, and wildlife care. Veterinarians can pursue rewarding careers working with pets, livestock, exotic animals, or public health organizations.

CAREER opportunities

- Veterinarian
- Equine Veterinarian
- Research Veterinarian
- College/University Teacher

HANDS-ON LEARNING WORKFORCE READY.

Take your first steps on the path to a career as a veterinarian

If you love animals, pre-veterinary allows you to turn your passion into a rewarding career caring for the health and well-being of pets, livestock, and wildlife.

At Bismarck State College, you can earn a two-year Associate in Science degree while you complete the core requirements needed for acceptance into a veterinary program. As you prepare to transfer, you'll be encouraged to choose a major and identify the four-year institution where you plan to continue your studies, to ensure you're completing the correct requirements at your institution of choice.

PREPARING FOR SUCCESS IN YOUR DEGREE

To prepare for pre-veterinary studies, you should take as much math and science as possible while in high school. BSC also strongly encourages you to review the requirements of the college, university, or veterinary school you plan to transfer to and work with your academic advisor to adjust your course selections as needed.

BSC takes a comprehensive approach to preparing you for a career in the health professions. You'll build a strong foundation in science and math through courses that transfer easily to universities and professional schools across the country.
