

NURSING TRANSFER

TRANSFER

The Nursing Transfer program at BSC provides the first two years of core classes toward a baccalaureate degree in nursing. Students study chemistry, anatomy and physiology, psychology, microbiology, sociology, nutrition, algebra, and statistics and complete general education courses required for an associate degree. Students who complete the curriculum requirements receive an Associate in Science that can transfer to a college of nursing at a four-year institution. Contact your BSC academic advisor for help with transfer planning.

PREPARATION AND REQUIREMENTS

High school students planning a registered nursing curriculum should take biology, chemistry and appropriate math courses. Those without this background should expect to spend more than two years at BSC. Anyone considering a career in nursing should have a sincere desire to help those experiencing health issues and the ability to deal with increasingly complex technology.

CAREERS

- Clinical nurse specialist
- Cardiovascular nurse
- Critical care nurse
- Genetics nurse
- Nephrology nurse
- Rehab nurse
- Nurse supervisor/administrator
- Healthcare consultant
- Public policy advisor
- Researcher
- Hospital administrator
- Medical/drug supply salesperson
