

COMPUTER SCIENCE TRANSFER

ON-CAMPUS

A computer scientist has nearly unlimited opportunities to find work in all sectors of the economy. Nationally, overall job growth for all computer occupations is expected to increase 22% through 2022, according to the U.S. Department of Labor.

CAREER opportunities

- Computer Systems Analyst
- Information Processing
- Software Engineer
- Computer Scientist
- Game Developer
- Database Administrator
- Programmer
- Software Developer
- Network and Computer Systems Administrator
- Information Security Analyst
- Computer Hardware Engineer
- Research Scientist
- Information Systems Manager
- Operations Research Analyst
- Web Developer
- Technical Writer

HANDS-ON LEARNING. WORKFORCE READY.

Gain the skills necessary to become a problem solver of the modern world with a degree in Computer Science.

In this field, you'll seek to understand the nature of problems and search for creative techniques to efficiently automate their solutions. These solutions assist governments, businesses and scientists of every kind. New software is designed daily, and existing technology is utilized and updated in virtually every area of business and industry. In today's world, the work of a computer scientist can reach globally and affect technological advances around the world.

PREPARATION AND REQUIREMENTS

To be successful as a computer scientist you will need to possess a strong mathematics background, knowledge of computers, logical and critical thinking, curiosity, problem-solving and troubleshooting skills, good organizational and communication skills, the ability to adapt to change, and work independently or as part of a team. Ongoing education and training in advancing technology are necessary throughout one's career.

The Computer Science program at BSC provides the first two years of study toward a bachelor's degree. By completing the program successfully, you will earn an Associate in Science degree.

**ASSOCIATE
DEGREE**

**BACHELOR'S
DEGREE**
