## HANDS-ON LEARNING. WORKFORCE READY.

**BSC's online Energy Management program meets the needs and demands of the energy industry for qualified supervisors and managers.**

Take advantage of the only Bachelor of Applied Science (BAS) Energy Management program in the nation, offered through the National Energy Center of Excellence. This program provides opportunities for energy employees to prepare for management positions. Thanks to BSC's professional partnerships, its curriculum is directly applicable to what current industry expects from its leadership. The program builds on energy-related foundations developed through previously completed energy education programs and your experience. Coursework includes general education classes and specific management courses. This program was developed in response to the nation's ever-increasing demand for all forms of energy and the growing need for highly trained energy workers who seek advancement in their careers.
