Being disorganized costs the average family hundreds of dollars per year and businesses thousands of dollars monthly, and it is estimated that people spend one year of their lives looking for lost items. Spending a small amount of time organizing everyday saves both money and time. This class will focus on key strategies of organization for every room in a home and business. The hours spent navigating through clutter can, instead, be time spent doing something enjoyable. By taking this class, you will learn to organize your way to happiness!

Money Matters

Real Estate Investing

Have you ever heard the old saying, “Buy low, sell high?” News stories about the softening real estate market might scare away some novice investors. Experienced investors, however, recognize weak markets as opportunities to pick up bargains. When there are more sellers than buyers, your chances of getting a good deal go way up. In fact, many investors make more money in a down market than in a strong one. In this course, you’ll learn how to make money in any area, in good times and bad, even if you have little money to start with.

We’ll start by developing a plan for your own investing efforts based on your personality and investing objectives. You’ll learn how to invest in foreclosures, manage a rehab project, and build your team of real estate professionals (title officers, lawyers, accountants, mortgage brokers, appraisers, and more). By the end of the course, you’ll be working toward your first (or next) deal.

Personal Finance

Do you have clear financial goals? Do you know if you have enough money to buy a car or house, if you can afford to take a cut in pay in order to go back to school, if you will have enough money to retire? Are you confident you can choose stocks and mutual funds wisely and do you know how to decide how much money you should allocate to these types of investments? Do you know how to keep good financial records and do you know which types of records you should keep and for how long?

If your answer to any of these questions is “No,” you need this course, which will prepare you for a lifetime of worthwhile personal financial planning. You’ll learn to create and use a budget, borrow and invest wisely, make intelligent decisions about insurance, and plan for your financial future. You’ll learn the essentials of household bookkeeping, record-keeping requirements, and much, much more.
